## CORE CAPABILITIES

# Integrated security solutions for real sites and real operational needs

### 1 CCTV

System design, installation, troubleshooting, upgrades and monitoring.

### 2 Access Control

Card, biometric and time-attendance based access solutions.

### 3 Alarm & Panic

Intrusion detection, alarm systems and emergency panic-button solutions.

### 4 Intercom

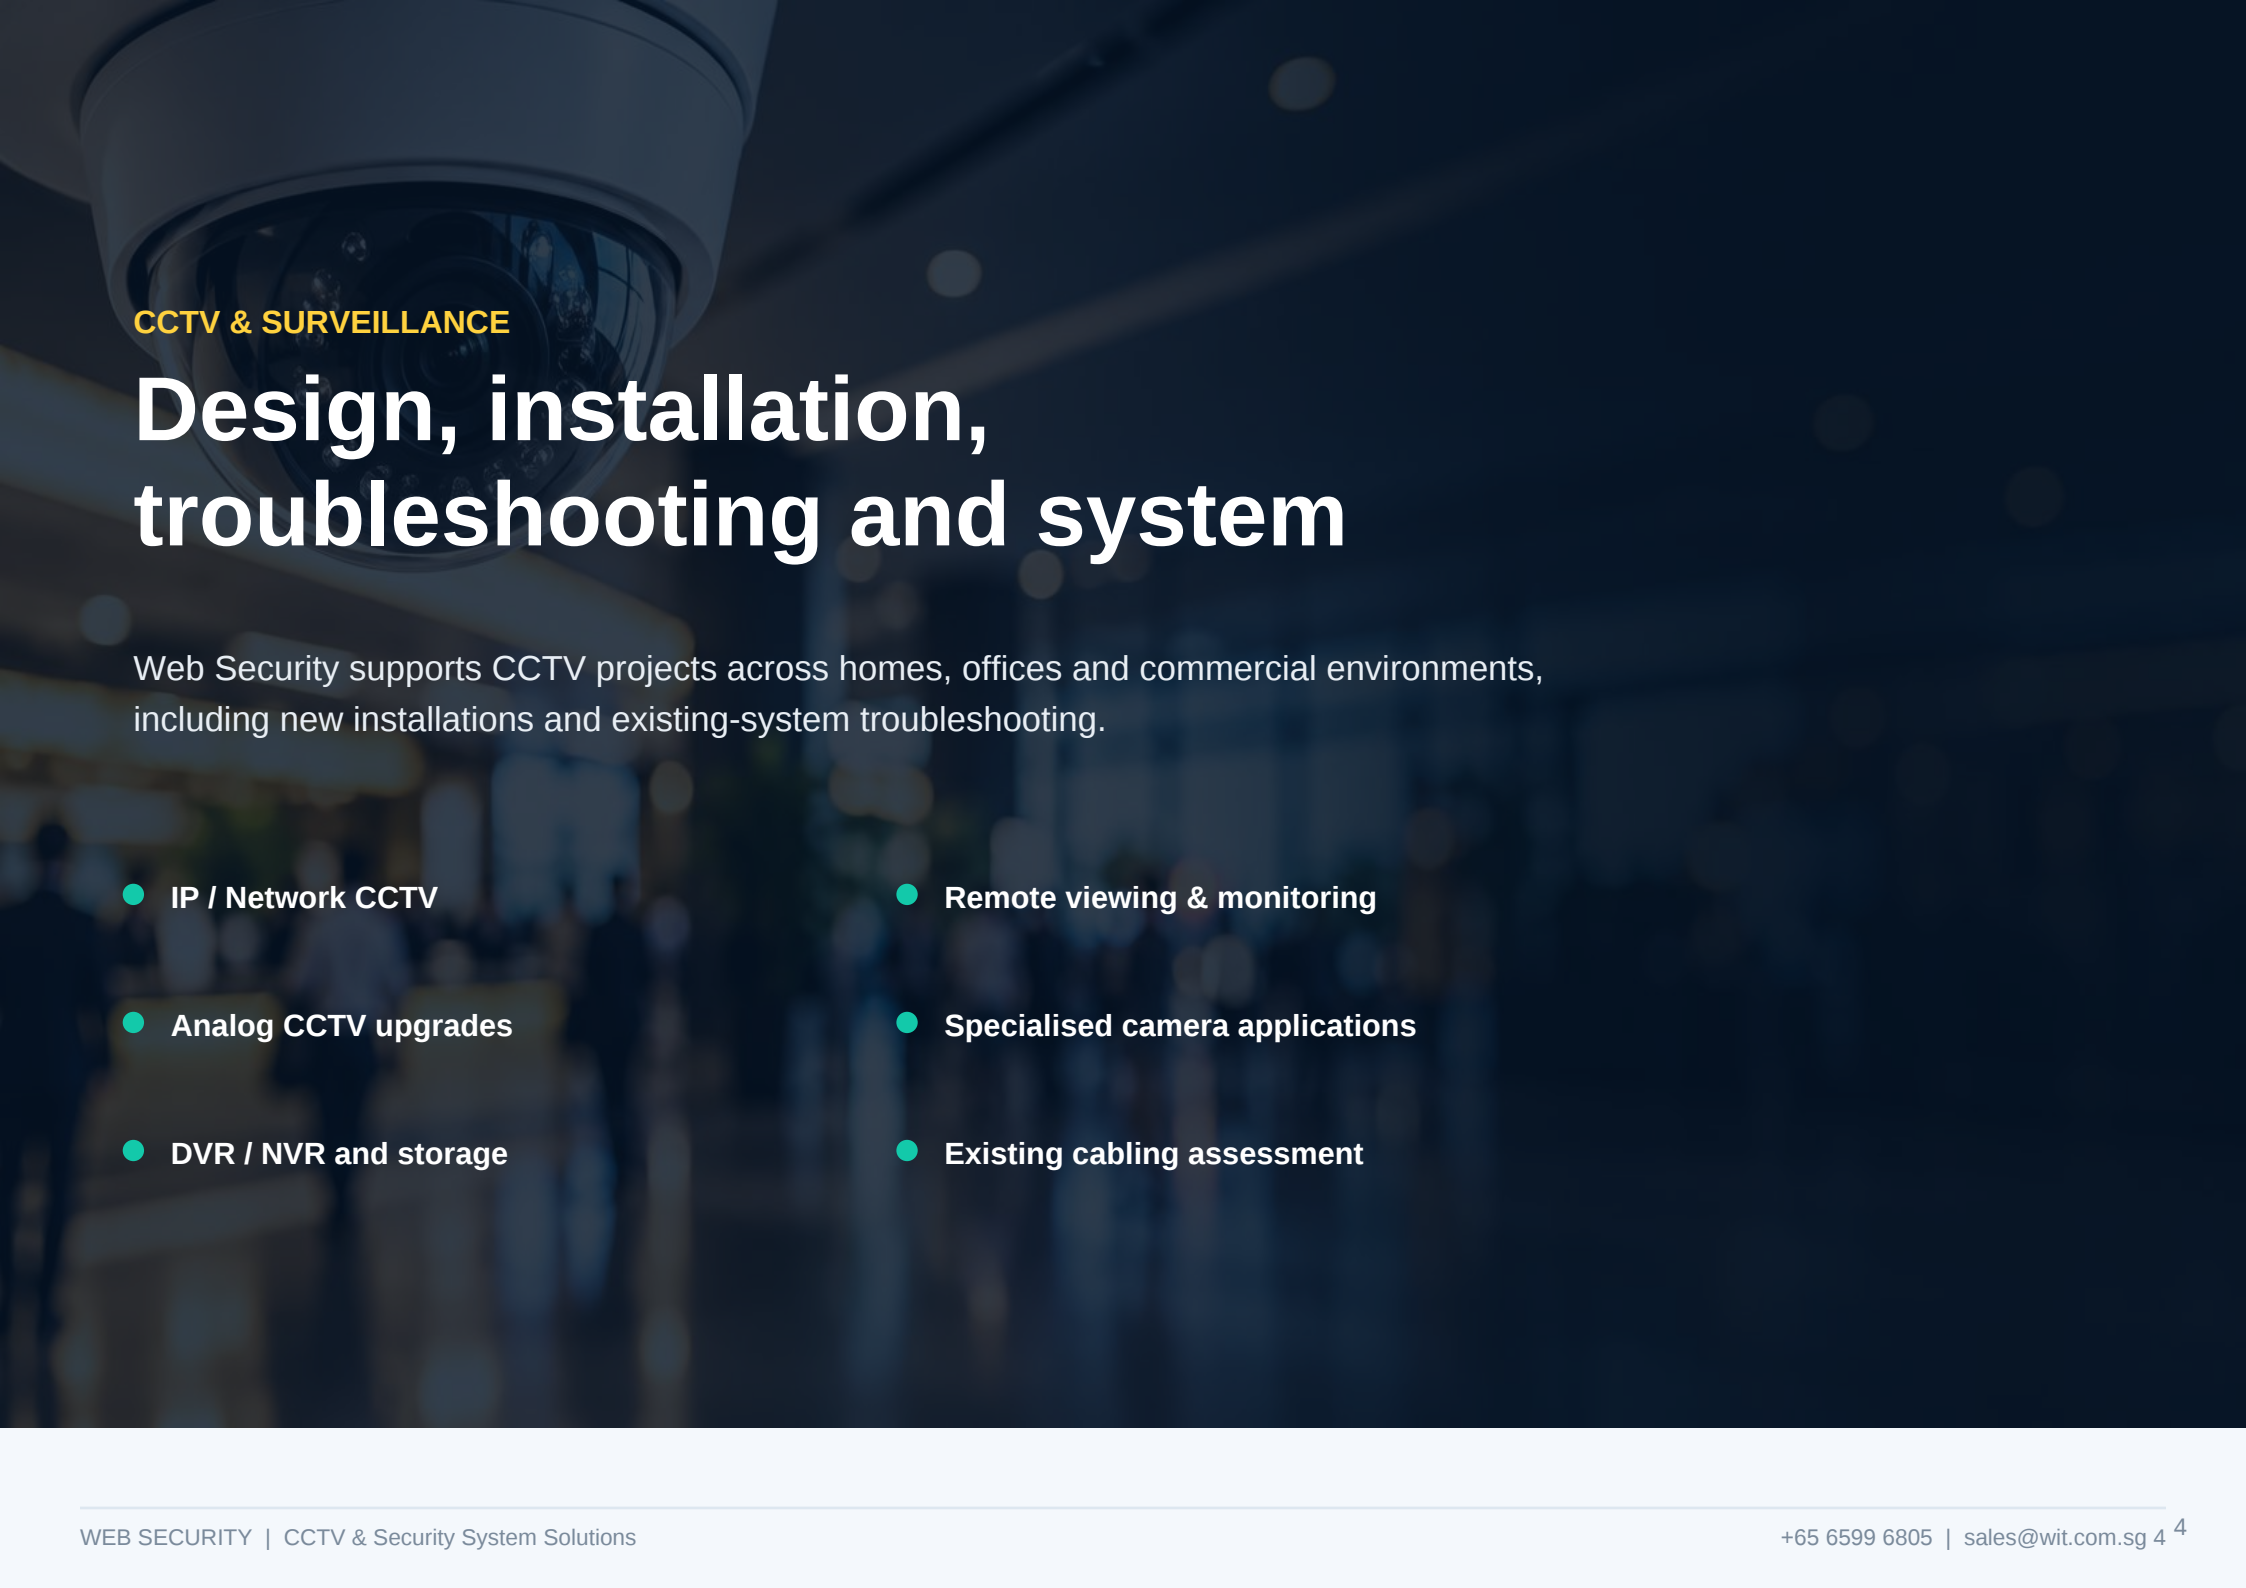

Video door phone and intercom solutions for residential and commercial use.

### 5 Network

Network cabling, data communication and supporting infrastructure.

### 6 Integration

Connecting security hardware, software and operational workflows.

## CCTV & SURVEILLANCE

# Design, installation, troubleshooting and system

Web Security supports CCTV projects across homes, offices and commercial environments, including new installations and existing-system troubleshooting.

- IP / Network CCTV
- Analog CCTV upgrades
- DVR / NVR and storage
- Remote viewing & monitoring
- Specialised camera applications
- Existing cabling assessment

## Layered security for people, doors and premises

### Door Access

Card access, biometric recognition, fingerprint-based access and time-attendance integration.

### Alarm Systems

Intrusion detection and alarm systems designed to support property security requirements.

### Panic Button

Emergency alert solutions for selected residential, commercial and operational environments.

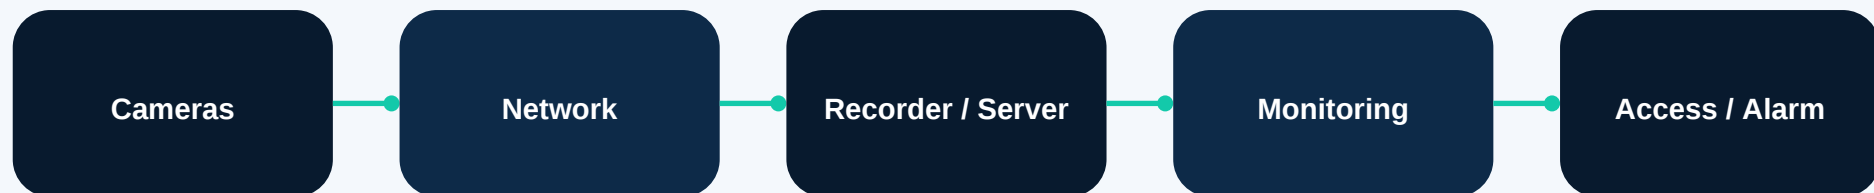

### Video Intercom

Video door phone and intercom systems that improve visitor screening and entry control.

## SYSTEM INTEGRATION

# Security works best when the infrastructure behind it is reliable

The original company profile lists data communication, data collection, system integration and software customisation among WIT's areas of focus. These capabilities support modern security deployments where cameras, access systems and monitoring platforms depend on stable connectivity and coordinated operation.

## Residential, commercial and industrial applications

### ● Homes & Condos

CCTV, intercom and alarm solutions.

### ● Offices

CCTV, access control and monitoring.

### ● Retail & F&B

Surveillance and staff / visitor access.

### ● Warehouses

Coverage, recording and remote monitoring.

### ● Factories

Perimeter, operational and site surveillance.

### ● Institutions

Security systems for schools and organisations.

## Selected Clients

### Reference List

Magma Heritage Pte Ltd

# Multi-brand security and technology experience

The original company profile contained product or technology pages for several security and IT brands. For the current profile, these are presented as brand experience rather than as a fixed product catalogue, because models and specifications change over time.
